

SkyLink TR-7 Tactical Manpack Radio

Secure wideband voice & data for units on the move

30–512 MHz	20 W	18 hours
FREQUENCY	OUTPUT POWER	BATTERY LIFE

The **SkyLink TR-7** is a rugged wideband manpack radio that keeps patrols, convoys and command posts connected — **voice, data and position** on one encrypted network, from **30 MHz to 512 MHz**.

KEY FEATURES

- Wideband 30–512 MHz, one radio for every net
- AES-256 encryption with over-the-air rekeying
- MANET IP data up to 1 Mbps
- Built-in GPS with blue-force tracking
- 20 W output, 5 W low-power mode
- MIL-STD-810H & IP67 submersible
- Hot-swap battery, 18 h mission time
- Front-panel programming, no PC required

WHERE IT'S USED

Border patrol · Convoy communications · Disaster response · Forward command posts · Critical infrastructure security

OVERVIEW

Built for the field, ready for the network

TR-7 combines long-range VHF/UHF voice with an IP data bearer, so teams can share **situational awareness**, messages and GPS tracks without extra equipment.

- **Interoperable** with legacy analogue nets and modern MANET waveforms
- **Hot-swappable** Li-ion packs for 18+ hours of operation
- **Front-panel** programming — no laptop needed in the field

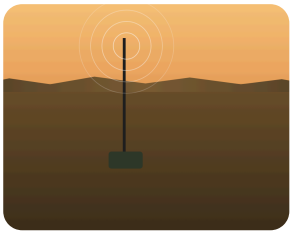

> *"Deployed with border and disaster-response units across three regions since 2022."*

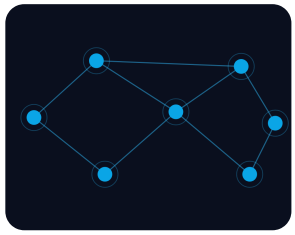

SPECIFICATIONS

Encryption	AES-256, OTAR
Data rate	up to 1 Mbps
Channels	100 presets
GPS	Integrated, NMEA out
Environmental	MIL-STD-810H, IP67 (1 m, 2 h)
Operating temp	−30 °C to +60 °C
Weight	2.9 kg with battery
Dimensions	270 × 90 × 240 mm
Interfaces	USB-C, Ethernet, audio (6-pin)
Warranty	3 years

BENEFITS

- One radio replaces separate VHF, UHF and data sets
- Lower training cost with a single, simple interface
- Longer missions with hot-swappable power
- Protected traffic with field-proven AES-256
